

Secure. Manage. Recover. Endpoints Without Compromise.

Monitor, Protect, Recover: Endpoint Mastery

One Bundle. Every Critical Capability.

From proactive monitoring and intelligent automation to advanced security and backup, everything you need to protect every endpoint.

Critical Device Monitoring

Continuously monitors endpoint health, performance, and security to detect issues early, reduce downtime, and ensure reliable IT operations.

Remote Control Sessions

Securely accesses and manages remote devices to resolve issues faster, minimize downtime, and deliver uninterrupted user support across org.

Patching — OS & 3rd Party App

Automates OS and 3rd-party application updates to eliminate vulnerabilities, improve compliance, and maintain secure, up-to-date endpoints.

Endpoint Antivirus

Protect endpoints against viruses, malware, and evolving threats. The base of your protection tier.

Endpoint XDR

Correlates endpoint, network, and security data to identify advanced threats. Available as the AV + XDR tier.

Critical Device Management

Manages endpoint configuration, health, and security posture from one place to keep devices compliant and reliably available.

Role Based Server Monitoring

Provides specialized monitoring for Active Directory, SQL, Hyper-V, VMware, Exchange, and other server roles to ensure optimal performance.

Dashboard & Reporting

Centralized dashboards and actionable reports to simplify monitoring, improve decision-making, and maintain complete visibility across IT environments.

IT Automation (AI-Based)

Automates routine IT tasks using AI-driven workflows to accelerate issue resolution, reduce manual effort, and improve operational efficiency.

Endpoint EDR

Detects, investigates, and responds to endpoint threats to accelerate remediation. Available as the AV + EDR tier.

Ransomware Protection

Detects and blocks ransomware attacks before encryption occurs to prevent data loss, reduce disruption, and safeguard critical business assets.

Server & WS Backup

Automatically backs up servers and workstations to protect critical data, enable rapid recovery, and ensure uninterrupted business continuity.

OUTCOMES

The Measurable Impact of Endpoint Essentials

Built around 10+ integrated modules — from Critical Device Monitoring and Automated Patch Management to Endpoint Protection, EDR and Ransomware Detection — Endpoint Essentials gives your servers and workstations enterprise-grade protection without enterprise-grade complexity.

37%

Fewer major outages

– 30%

Reduction in IT ticket volume

70%

Faster resolution time (MTTR)

< 24h

Recovery of backup in less than 24 hours

60%

Lesser breaches from automated patching

– 60%

Slash your software cost by 60% or more

One Bundle, Deployed Your Way

One bundle across servers and workstations — with your endpoint protection tier chosen to match your security posture.

Servers & workstations

10+ modules

WHAT'S INCLUDED

Choose your endpoint protection tier — Endpoint AV only, Endpoint AV + EDR, or Endpoint AV + XDR.

Backup storage of 250 GB per endpoint (fair usage policy).

Modules by default: Critical Device Monitoring, Role Based Server Monitoring, Remote Control Sessions, Dashboard & Reporting, IT Automation (AI-Based), Patching — OS & 3rd Party App, Ransomware Protection.

Flexible contract terms to match your IT planning cycle.

PROTECTION PARTNER OF YOUR CHOICE

Bitdefender®

SOPHOS

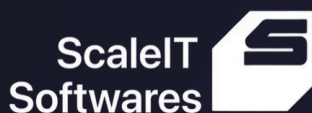

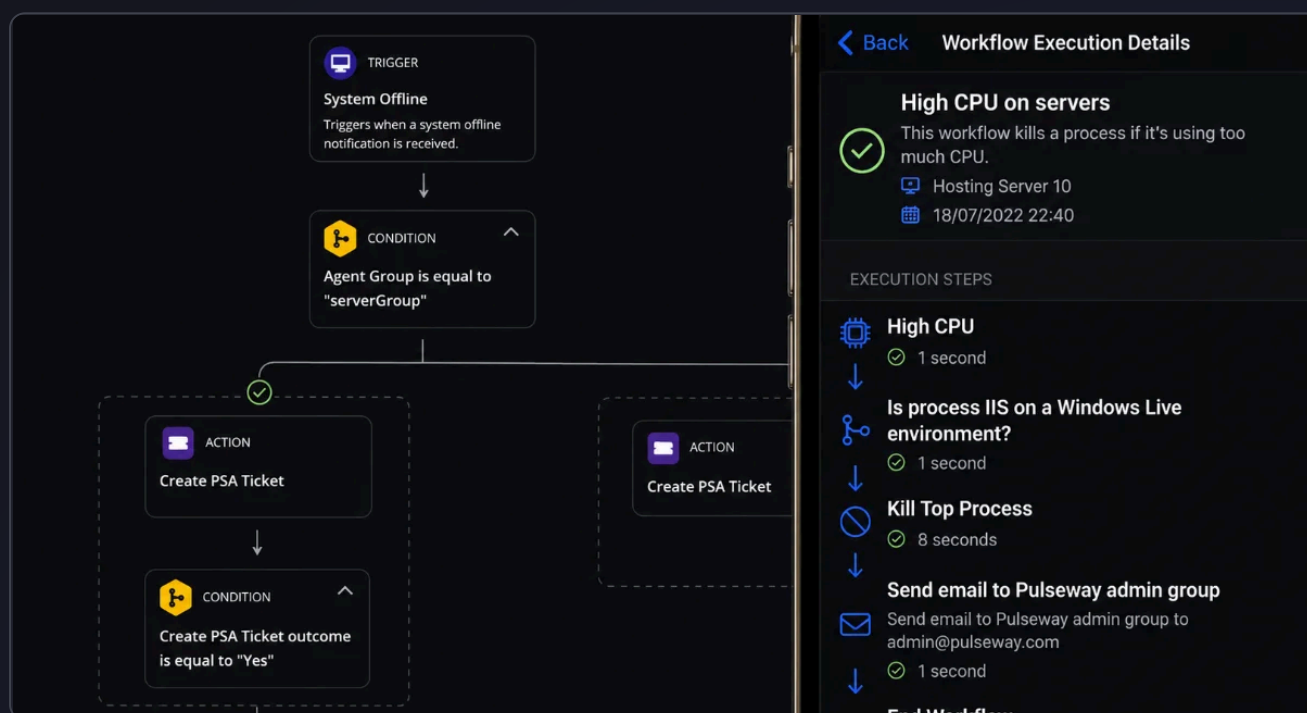

TREND MICRO

Have more than 2000 endpoints? Talk to us about a tailored deployment.

"Since switching to Endpoint Essentials, our IT team spends far less time firefighting and more time on projects that actually move the business forward. Patch management alone used to eat a full day a week — now it just happens."

— Director of Card Operations
